

**"If it's too Loud, You're too Old"**

## **VINTAGE 108**

### **SPECIFICATIONS AND WARRANTY**

This versatile guitar amp has the ability to use the standard 2- 6V6 power tubes, or can be run with a single 6V6 for a softer output, a single 6L6, or a single EL34. Please consult owner's manual before making any tube substitutions. Such variations should only be performed by a qualified electronics technician.

Amplifier is custom built per your order; a number of optional equipment variations are available. Contact us with any specific requirements.
